August 9, 2006

Dear Participants and Badminton Friends,

Welcome to the 2006 U.S. Open Badminton Championships, and the 2006 Senior International Badminton Championships. We are proud to be the title sponsor of the Championships, and we look forward to an outstanding tournament that will be filled with enthusiasm and excitement.

Yonex, in cooperation with USA Badminton, has been committed to making badminton better known as a high level, professional sport across the globe. As each year passes, we have seen the sport of badminton and its popularity grow by leaps and bounds, and we are honored to be associated with such a great event.

The U.S. Open has become a premier platform for players across the globe to showcase their talents and compete in a high exposure, top-level competition. The level of talent and competition has risen each and every year, and it is easy to see why this tournament, The United States Open, is becoming the type of event that every badminton player will dream of winning.

I would like to take this opportunity to thank USA Badminton, the IBF, The U.S. Open Tournament Committee, Orange County Badminton Club, K & D Graphics, and especially Don Chew and his family for their commitment and devotion to growing the future of the sport of badminton. Additionally, many thanks to the volunteers and staff for making this event possible, and to the players for showing their caliber of play.

Good luck to all participants, and much success to the 2006 U.S. Open Badminton Championships!

Sincerely,

A handwritten signature in black ink, appearing to read "C. Renge".

Chitose Renge  
President/CEO

**K&D GRAPHICS**

August 9, 2006

Dear Participants and Badminton Friends:

Welcome to the 2006 Yonex/OCBC US Open and Senior International Badminton Championships, and to the Orange County Badminton Club. We are proud to have the honor and privilege of hosting this \$30,000 World Grand Prix event for the tenth year at our badminton facility. 129 athletes will compete for the US Open titles. In addition, over 82 athletes will have fun in the senior divisions as they compete for the 20 international senior titles.

The US Open is a great sequel to the 2005 World Championships (at the Arrowhead Pond) for badminton lovers in the US. It is very important for badminton supporters to spread the word and come watch premier badminton events because their success will lead to future, bigger international events in the US.

We would like to thank Yonex Corporation for their sponsorship of the tournament and their continued support of badminton at the Orange County Badminton Club. Many thanks to the International Badminton Federation, USA Badminton, the Organizing Committee and the volunteers of Southern California Badminton Association for their endless dedication and contribution to the success of this tournament.

We hope you will enjoy the tournament and your stay here in sunny Southern California.

Best wishes and good luck to all the participants!

Sincerely,

A handwritten signature in black ink, appearing to read "D. Chew".

Don Chew  
President/CEO

A handwritten signature in black ink, appearing to read "Kim Chew".

Kim Chew  
Chairwoman

August 9, 2006

Dear Badminton Friends:

On behalf of USA Badminton, the Southern California Badminton Association, and the U.S. Open Organizing Committee, I would like to welcome you to the 2006 Yonex/OCBC US Open and 2006 Yonex/OCBC Senior International Badminton Championships. It is exciting that US badminton can build on the success and exposure it received at the 2005 World Championships by hosting a world-class event such as the US Open. I know the stars of this event, the 129 Open athletes and the 82 Senior athletes from all over the world, will amaze the crowd with their spectacular rallies and their amazing athletic abilities.

Special thanks to the Yonex Corporation, Orange County Badminton Club, and K & D Graphics for their support of the Yonex/OCBC U.S. Open and the Yonex/OCBC Senior International. We are extremely grateful to Mr. Don Chew and his family for making this event possible.

The US Open and Senior International is also supported by the DoubleTree Hotel, the International Badminton Federation, USA Badminton and Southern California Badminton Association, who support us in many ways to help create an outstanding event. Additional appreciation should also go to our tournament officials, staff and volunteers for all of their hard work.

Lastly, I would also like to thank our loyal badminton fans for their continuing dedication to badminton. Your support of the US Open will make future major badminton events in the US possible.

To all the athletes, good luck and enjoy the tournament!

Sincerely,

Paison Rangsitpho  
Tournament Director

August 6, 2006

Dear Participants and Friends,

On behalf of USA Badminton and the National Office it is indeed a pleasure to welcome you to the OCBC/Yonex U.S. Open and Senior International Badminton Championships. This event annually draws top quality players from across the United States and throughout the world and there is sure to be plenty of exciting badminton on display. I know many of you look forward to this yearly event to renew friendships and rivalries but also recognize the importance of this competition as results are used for international rankings.

USA Badminton thanks the Yonex Corporation and K & D Graphics for again sponsoring this prestigious event, the Orange County Badminton Club for facility support and the Chew Family for their outstanding hospitality. In addition, thanks to Pisan Rangsitpho, Tournament Director, the tournament committee and the volunteers and staff behind the scenes for the countless hours of work they have put into making this event happen and in ensuring that it is a well-run and high-quality tournament. And as always, my thanks go to the officials for their efforts in maintaining fair play on court.

To everyone involved with this year's 2006 U.S. Open and Senior International Badminton Championships, please accept my best wishes for a successful tournament and an enjoyable time.

Sincerely,

A handwritten signature in cursive script that reads 'Dan Cloppas'.

James D. Cloppas  
Executive Director

*Yonex is the Official Equipment Sponsor and Official Shuttlecock Supplier for USA Badminton*

World #1 in badminton.

WWW.YONEX.COM

**Elastic Ti realizes a player's dream—high elasticity and high strength in the same frame**

Elastic Ti delivers the performance players have long wanted in a frame—high elasticity and high strength together. This well-balanced combination of high-rebound elasticity, like rubber, and structural high strength lets players mix and match play techniques, play strategies, and frame performance characteristics to winning advantage. Moulded into both sides of the frame, the Elastic Ti frame overcomes the limitations of conventional frame material. With its powerful rebound effect, a split second after impact and deflection, the Elastic Ti Frame snaps back to its original shape to launch the shuttlecock down court with high accuracy and with the full energy of the swing.

**NANOSCALE TECHNOLOGY**

Fullerene is a compound composed of carbon atoms. 60 carbon atoms comprise one fullerene molecule.

1  $\mu\text{m}$   
Carbon fiber with Fullerene

10  $\mu\text{m}$   
Conventional Carbon fiber

Carbon Fiber  
Glue

**Nanoscale Technology for more repulsion and speed from a compact swing**

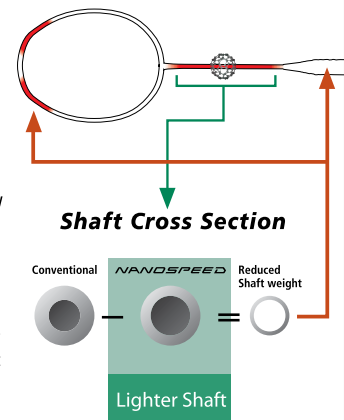

Traditional racquet constructions increase the thickness of graphite or carbon fiber layers for high strength, which adds weight to the frame and makes a racquet difficult to maneuver. The YONEX nanoscale-structure uses nanoscale-size particles of fullerene and carbon. The YONEX nanoscale-particle

engineering process gives YONEX sensitive control over how the racquet materials function at the molecular level. The process establishes a high-performance molecular bond of the materials and creates a stable, thinner and stronger headlight racquet that delivers maximum power and speed from a compact swing.

**30% more Impact Resistant**  
**10% more Durability**  
**5% more Power**

Factory testing demonstrates that by Nanoscale Technology frame—the part of the racquet where stress concentration is highest—the YONEX NANOSPEED provides 30% more impact resistance than an ordinary racquet, 10% more durability and 5% more repulsion power.

The reduced shaft weight is transferred to the grip realizing a new dimension in badminton racquets.

**NANOSCALE TECHNOLOGY FULLERENE**

**LSC SYSTEM**

Elastomer

Cross-section of Frame

NS6000

Conventional Racquet

15% less Shock

**LSC SYSTEM**

**15% less shock enhances your athletic performance.**

The LSC (Low Shock for Comfort) system minimizes impact shock through the inherent shock-absorbing properties of Elastomer. As a result of powering the frame for less impact shock, arm comfort is significantly raised and shock at impact is reduced to 15% less than what is experienced using a conventional racquet.

**Solid Feel Core**

Solid Feel Core

Conventional

2  
-1  
-1

TIME 0.85sec

2  
-1  
-1

TIME 0.85sec

**Solid Feel Core for enhanced comfort.**

Shock absorbing compounded powder is loaded into the frame to reduce uncomfortable vibration, so that only solid feel remains in hand for more precise control.

**Delta Power Frame**

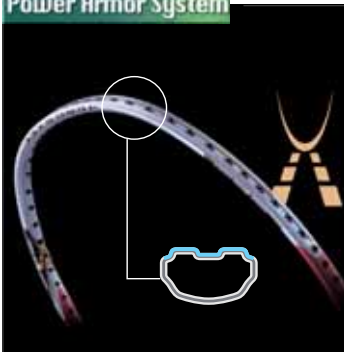

Aerodynamic Shape

Box Shape

Aerodynamic shape minimizes air resistance, so accelerates head speed and transferring more speed and power into hits. Box shape provides solid feeling and face stability available. YONEX applied these technologies to the new Delta Power Frame, which creates a stable and solid hitting face without sacrificing its power.

### Power Armor System

### gForce Ti launches speed and power to the next rank.

The gForce Ti Power Armor System integrates the principles of gravitational acceleration and the high-repulsion properties of gForce Titanium to launch players to the next level of power and speed. Paring of the top of the Armortec frame maximizes the frame's acceleration-of-gravity characteristics for more speed and minimizes oscillation for distortion-free performance.

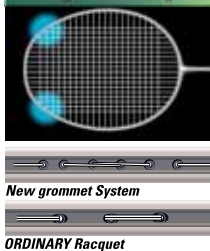

### C.S.CAP

### Control Support Cap for agile play

The YONEX Control Support Cap (CSC) is based on studies analyzing the styles of play of the world's leading players. CSC provides an 88% wider flat surface compared with an ordinary racquet for easy gripping, fast swing-through and the quickest maneuverability.

### New grommet System

### Single-pass stringing, grommet-hole construction for a more durable frame

The YONEX single-pass grommet hole construction provides more grommet holes at the 10 o'clock and 2 o'clock position of the frame, creating a high-performance stringing pattern that puts 7% more durability upward in the Armortec-800 frame for increased protection.

### AT800

### YONEX technology creates high-speed racquets customized for doubles play.

High-speed Armortec-800 Offensive has a boxed shape cross-section that builds a high-power frame with excellent face stability. High-speed Armortec-800 Defensive has an aerodynamic cross-section that minimizes air resistance for neat-handed play.

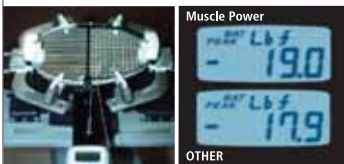

## ARMORTEC

### MUSCLEPOWER

### Rounded grommet holes position the string for aggressive power.

Muscle Power seats the string on rounded archways that eliminate stress-load and fatigue through contact friction. The construction creates total unity of the string and frame through closer-and-tighter contact.

### Tension-holding durability

A string loses its tension over time when it is seated on the sharp corners of an ordinary grommet-hole system. The Muscle Power construction extends the durability of string through improved string seating for uniform, dependable, long-term performance.

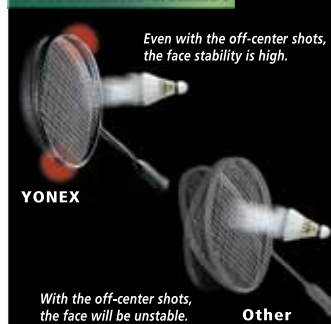

## MUSCLEPOWER

### Ultimum Ti™

Ultimum Ti is three times stronger than ordinary titanium and provides two times more sustained high-repulsion power than graphite. Moulded into the racquet shaft, it effectively stores energy on impact, then releases it in a quick-and-powerful "snap-back" action that transfers the full energy of hits directly to the shuttlecock.

### TITANIUM MESH

YONEX Ti Mesh fibers are 2.5 times harder and 2.3 times heavier than graphite. Ti Mesh racquets demonstrate excellent resistance to the high twisting forces generated at impact and have a mass ideally balanced for more face stability and head speed.

### ISOMETRIC

The YONEX Isometric Square Head Shape provides a larger effective hitting area than an ordinary racquet. The Isometric Square Head Shape equalizes the length of main and cross strings in the stringbed, enlarging the sweetspot for more consistent accuracy even on off-center hits

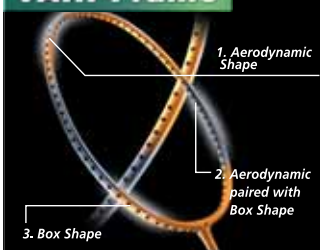

### Built-in T-Joint

PAT.No.1388354  
(DEN, GER, FRA)  
PAT.No.1388355(UK)

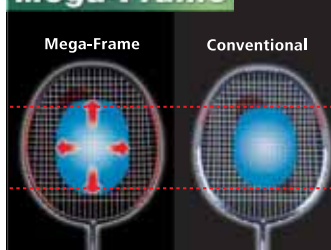

Moulded deep into the layers of graphite where the frame connects with the shaft, the YONEX Built-in T-Joint creates a durable and high-strength one-piece frame that is torque-free.

### VARI-Frame

Aerodynamic contouring of the top of the frame minimizes air resistance so air flows faster across the curved surface during swinging—accelerating head speed and transferring more speed and power into hits. This construction tapers into the YONEX Box Shape midway the frame for high stability, low-torque performance and more accuracy.

### Mega-Frame

Due to its unique large-frame design, the Mega-Frame further enlarges the already large sweetspot provided by the YONEX Isometric Square Head Shape. Compared with an ordinary racquet, the Mega-Frame provides a 34% larger sweetspot for more reach and more effective off-center hits.

Southern California has a large number of U.S. Open Badminton Championships to its credit, far more than any other area. With the wonderful weather, more than its fair share of entertainment, the beautiful Pacific Ocean readily available, the neon fascination of Hollywood and any type of food you might want, California seems to have it all. Why wouldn't badminton players want to visit this area again and again? California also boasts large populations from nearly every nation who are aware of this fine sport.

The first time Southern California launched into the international event was 1955 when Long Beach played host. It was an exciting time for the Southern California badminton community. Most either worked at that Open, or played; and everyone watched.

The flavor of the 1955 event left the community wanting more, and Long Beach again hosted the tournament in 1961. In 1968 the venue moved a few miles to Fullerton for another Open.

Since 1937, there has been a national championship held in the United States. The national became international in 1954, when athletes from outside the United States were invited to compete. Some years, just a few came from outside the country, other years there were terrific entries from touring countries. Nearly always, there has been loyal support for the tournament from Mexico and Canada.

**Camilla Martin**  
1997 US Open (5-Star)  
Women's Singles Champion

Some questions were raised over the years that the tournament would not allow the best American players to be crowned if international players competed. For a period of years there was a combination - just a closed event, just an open event, or both - leading to a mixed array of tournament records. At one point there were no U.S. Open's for several years.

In Manhattan Beach, California, in 1979, Wes Schoppe organized an international event which was successful enough to be repeated the following year and continued into the early 1980's. Since the United States had not hosted a U.S. Open since 1976, the success of the California event led to negotiations to rename Schoppe's annual tournament the new U.S. Open. For the next five

years Manhattan Beach Badminton Club continued to host the event.

The venue changed in 1988 to Ambassador College in Pasadena, California, with Chris Kincard at the helm. The move was a decision made by the United States Badminton Association to enlarge the potential audience with more seating and more courts.

The 1990's began with a move to the Bren Center at the University of California - Irvine with event director Paisan Rangsitkitho. The purse was now enlarged and new sponsors brought in. The large facility provided plenty of space for a variety of booths and full-time medical assistance.

After stops at Loyola Marymount and the University of California - Los Angeles in 1993 and 1994, the U.S. Open traveled outside California for the first time in 1995. As part of preparations for the 1996 Summer Olympic Games in Atlanta, the 1995 Open was held at Georgia State University.

Less than two months after the successful Olympics, the U.S. Open returned not only to California, but to a brand new facility. The Orange County Badminton Club had just been dedicated earlier that summer. The OCBC was the largest, most modern and most complete badminton facility in the Western Hemisphere.

The 1996 tournament was also historic because of the sponsorship by the Hong Ta Shan Group, whose support provided a \$200,000 prize purse, the largest prize fund ever for a badminton tournament in the United States. In 1997, the Hong Ta Shan Group once again sponsored the six-star \$200,000 U.S. Open.

**Poul-Erik Hoyer-Larsen**  
1997 US Open (5-Star)  
Men's Singles Champion

1998 saw the economic collapse of the Asian economy. Sponsorship difficulties caused many Grand Prix tournaments to reduce their prize purse or to cancel completely. Although the 1998 U.S. Open was reduced to a one-star IBF tournament, the competition was fierce with four of the five final events going three games.

The 2006 U.S. Open returns to OCBC for the tenth year with a \$30,000 prize purse sponsored by Yonex Corporation, the Orange County Badminton Club, and K & D Graphics. 129 players will compete for the five prestigious US Open titles.

## SENIOR INTERNATIONAL BADMINTON CHAMPIONSHIPS - PARTICIPANTS

The OCBC/Yonex Senior International is the only tournament in the United States to offer a combined age doubles format. Instead of events based on an individual's age, the ages of the doubles team members are added together to qualify them for an event (even months and days are used to calculate the sum of a team's total age).

Variety is the spice of life and with the combined age doubles system, unusual partnerships are bound to occur. For instance, a 35 year-old player can team up with a 65 year-

old partner and compete in the 100+ combined doubles event. The only individual requirement is that the player must be at least the age of 35. Men's doubles, women's doubles and mixed doubles all compete under this format in 80+, 90+, 100+, 110+, 120+ and 130+ age divisions.

Singles competition retains the regular tournament format. There's nothing you can change. Singles divisions are offered to players who are 40+, 45+, 50+, 55+, 60+ and 70+ ages.
